

The campus occupies 11 hectares (27 acres) in Clementi, just west of the Singapore central business district in an established educational hub. The College opened in an existing school in 1971, and features mature trees and plenty of open spaces.

In the past decade, the campus has undergone a rejuvenation which included the construction of two new buildings, refurbishment of several others and the enhancement of already extensive sports and performing arts facilities to ensure our education remains current. Awarded for its sustainable design features, universal accessibility features such as interconnecting, off-ground walkways to facilitate traffic between buildings on campus have been incorporated to facilitate student access to the facilities that support the learning programme.

Key aspects of the GreenMark Platinum certified buildings are integrated into the learning programme, and the development of a 'green heart' will transform the core of the campus into a vibrant and inspiring space for our community.

The campus offers the following specialist facilities:

- Infant classrooms are all connected to central pods and outdoor learning and play spaces. There is a dedicated playground and specialist teaching facilities for music the K1 Perceptual Motor Programme
- Junior School classes are in a dedicated block with grade-level shared spaces and specialist teaching facilities for music, languages and art in the building
- two libraries: one for Primary School students, the other for Middle and High School students which both feature flexible spaces and extensive state-of-the-art resources
- professional-quality performance spaces: heritage-listed main hall seats over 400; other smaller spaces include two theatres, a black box theatre and a multi-purpose space seating between 200 and 300
- drama, dance and film teaching rooms and equipment including dedicated wardrobe, lighting and sound technicians and professional standard equipment
- exceptional music provision includes recording studios, practice rooms, class sets of instruments in the Junior School, an extensive Instrumental Teaching Programme and instrument hire
- Design and Technology centre includes curriculum-specific equipment such as 3D printers and laser cutters
- sciences block with fully-equipped laboratories
- specifically-designed, fully-equipped rooms for visual art including photography darkroom and gallery spaces
- food technology classrooms
- dedicated play areas and equipment for students in the Infant, Junior and Middle schools
- extensive sports facilities: one full-sized, all-weather football pitch with covered spectator stand; three additional grass junior pitches and training areas; floodlit 10-lane 50m swimming pool with diving pit and 1m, 2m and 3m boards plus a learn-to-swim pool and covered spectator seating; nine floodlit acrylic tennis courts that incorporate four netball courts; floodlit artificial turf fields for football or hockey; two indoor air-conditioned sports halls including a 20x8m climbing wall; a fully-equipped conditioning gym; a multi-purpose sports room; and a gymnastics training centre incorporating full sprung floor area, vault, bars, beam and foam pits
- high and low ropes courses plus a set of training kayaks to support the Outdoor Education programme
- IDEAS Hub, a makerspace and collaborative workshop
- integrated IT facilities with access to a campus-wide wireless network, and a central IT help desk for all students. The provision includes iPad and MacBook sets in Primary School classrooms and individual laptop ownership scheme in Grades 6–12. Our teachers use a wide range of technology to support learning, including interactive whiteboards in all classrooms
- two residential boarding houses for students aged 13–18
- two canteens with undercover seating and an air-conditioned coffee shop with onsite catering by Sodexo from 7.30am–7pm weekdays
- medical clinics in Primary Block and boarding house staffed by registered nurses
- 24-hour security

Set on 5.5 hectares (13.5 acres) in a rapidly developing hub in northeast Singapore, the campus is easily accessed from central, eastern and northern areas of Singapore.

The purpose built campus opened in August 2011 and still provides a global benchmark in design and innovation in international schools. The distinctive facility is entirely suited to the unique UWCSEA ethos and educational style, so much so that key environmental aspects of the GreenMark Platinum certified buildings are integrated into the learning programme.

Layered in order to maximise the use of available space, car and bus transit areas, parking and indoor sport spaces are located below ground level and all traffic is separated from pedestrians. The campus was also designed to be easily accessible by people of all ages and abilities and has a universal design award.

A greening programme on campus provides our community with spaces in which they can connect with nature.

Specialist facilities include:

- dedicated Infant School with purpose-built facilities including flexible classroom spaces that are accessible to outdoor learning and play areas, grade level 'pods' for creative learning and play, age-appropriate playground, a learn-to-swim pool, specialist teaching facilities for languages, music and cooking, and a multi-purpose hall for physical education, assemblies and performances
- Junior School block with flexible classroom spaces, age-appropriate playground, and specialist teaching facilities for languages, music and art
- two libraries equipped as state-of-the-art resource centres—one for the Primary School and one for students in Middle and High School
- integrated IT facilities with access to a campus-wide wireless network, and a central IT help desk; the 1:1 provision includes iPad and MacBook sets in Primary School classrooms and individually owned laptops in Grades 6–12; interactive whiteboards in all classrooms enabling use of a wide range of specialist teaching aids
- fully-equipped science laboratories
- visual art facilities including art rooms, a darkroom and photography studio, and a ceramics studio
- drama classrooms and dance studios
- professional-standard specialist music facilities: studios, practice rooms, recording studios and teaching facilities, an Instrumental Teaching Programme and instrument hire, as well as a Balinese gamelan orchestra
- professional-quality performance venues: a tiered auditorium with 420 seats, a black box theatre seating 270, and a multi-purpose main hall seating up to 500
- fully-equipped Design and Technology workshops and the Community Lab, a collaborative makerspace for use by the school and neighbouring community
- dedicated food technology facilities linked with the school canteen
- canteen and undercover seating, with onsite Sodexo catering including a two-storey air-conditioned coffee shop operating from 7.30am to 7pm weekdays
- extensive sports facilities: 10-lane 50m Olympic-sized pool with covered spectator seating; floodlit, all-weather field that meets FIFA 2* and IRB international standards with covered spectator seating; three air-conditioned indoor sports halls; a fully-equipped gymnastics centre; well-equipped fitness centre for cardiovascular conditioning and weight training; two large studios for fitness and dance classes; and a CrossFit training room
- a covered outdoor climbing wall plus a set of training kayaks
- Tampines House is a purpose-built boarding house with 4, 3, 2 and 1 bedded rooms available to students aged 13–18 (Grades 8–12)
- medical clinics next to the Primary Block and in boarding house are both staffed by registered nurses
- 24-hour security
